SUMMARY

- : Aspiring Data Analyst with strong skills in SQL, Power BI, Excel, and Python. Currently working as a Data Practice Intern at MethodHub Software Limited, contributing to the data modeling and database design of the ARROWS Applicant Tracking System. Experienced in building dashboards, performing data analysis, and developing machine learning models to generate actionable business insights.

EDUCATION

- **Rajalakshmi Engineering College** Chennai, India
• *Bachelor of Engineering - Biomedical Engineering; CGPA: 7.5* 2021 - 2025

SKILLS SUMMARY

- **Programming Languages:** Python, SQL, MATLAB
- **Visualization Tools:** Power BI, Excel
- **Database:** MySQL
- **Data Skills:** Data Modeling, Data Cleaning, Data Visualization, Machine Learning, Deep Learning

INTERNSHIPS

- **MethodHub Software Limited – Data Practice Intern (Nov 2025 – Present):** Worked on designing and developing the data model for the ARROWS Applicant Tracking System by identifying core entities such as Candidate, Job, Client, and Recruitment Stages. Defined relational database schema including primary and foreign key relationships, ensuring normalization and data integrity. Analyzed recruitment workflows and translated business requirements into scalable database structures.
- **Infotact Solutions – Data Analyst Intern (Oct 2025 – Dec 2025):** Performed data cleaning, preprocessing, and analysis using SQL, Excel, and Python. Developed interactive Power BI dashboards to track key performance indicators and visualize business insights. Automated reporting processes and supported data-driven decision-making.
- **TATA Group – Data Analytics Intern (Dec 2024):** Built a logistic regression machine learning model to predict business risk and improve decision accuracy. Performed preprocessing, feature selection, and model evaluation. Developed dashboards to visualize insights.

PROJECTS

- **Spotify Data Analysis (Python, SQL, Power BI):** Performed data cleaning and preprocessing on Spotify dataset using Python and SQL. Conducted exploratory data analysis to identify trends and developed interactive Power BI dashboards to visualize insights.
- **Quantitative Analysis of Sweat Gland Activity (Python, MATLAB, Machine Learning):** Developed a system using image processing and machine learning techniques. Applied feature extraction and classification algorithms to identify dermatological disorder severity and achieved high accuracy.
- **ICU Mortality Prediction using Machine Learning (Python):** Built predictive models using Logistic Regression and Random Forest. Performed preprocessing and evaluation to improve performance and support healthcare decision-making.

CERTIFICATIONS

- **Data Analytics Certificate – Great Learning:** Completed course covering data analysis, visualization, and business insights using real-world datasets (2026)
- **Data Analyst Course – Simplilearn:** Completed training in Excel, SQL, and dashboard development for analytics (2026)
- **Databricks Data Analytics Certificate:** Completed certification covering SQL analytics, big data processing, and modern data analytics platform concepts (2026)
- **Python for Data Analysis and Machine Learning – Udemy:** Completed Udemy certification covering Python programming, Pandas, NumPy, data visualization, and machine learning applications (2025)

LANGUAGES

- **English:** Professional
- **Tamil:** Native
